

Instructions

1. After printing out the spinner on cardstock, cut it out or laminate if your spinner will get a lot of use.
2. It helps if you make a small hole in the center of the spinner to make it easier to push the brad through. You can use the sharp point of a scissor or another tool.
3. After you put the brad through the spinner, fold it back. But don't fold it all the way to the spinner. Leave $\frac{1}{2}$ " or so between the top of the brad and the part of the brad where you fold it back.
4. Turn the spinner over and pull the unbent part of the brad through so the $\frac{1}{2}$ " of the unbent brad shows.
5. Place the paper clip over the brad to attach it to the spinner. You can use the spinner just like this.
